

This 8" bass loudspeaker has its parameters optimised for a clean bass reproduction. It features a die cast aluminium basket, polypropylene cone with rubber surround and long excursion voice coil. This model may be fitted into bass-reflex or closed enclosures in high quality multi-way systems such as studio monitors and domestics cabinets.

Modelo de 8" con unas características excepcionales para alta fidelidad: membrana de polipropileno y suspensión de goma de gran elongación, chasis de aluminio fundido y estructura magnética de gran tamaño. El resultado son unos bajos de gran impacto y unos medios nítidos y naturales para recintos de tipo bass-reflex o herméticos.

NOTES

The power capacity corresponds to the RMS maximum value that can dissipate the loudspeaker when a sinus signal is applied for a period of at least two hours.

Program power is defined as the transducer's ability to handle normal music program material.

** T-5 parameters are measured after an exercise period using a preconditioning power test, using a velocity-current laser transducer, and will reflect the long term parameters, once the loudspeaker has been working for a short period of time.

NOTAS

NOIAS

"La potencia admisible corresponde a la máxima potencia RMS que puede disipar el altavoz durante al menos dos horas, cuando se le aplica una seña lsenoidal determinada.

Por potencia programa se entiende la capacidad del altavoz en el manejo de señales transitiorias, como sería el proporcionado por el contenido de un pasaje musical normal.

**Los parámetros T-5 han sido medidos después de un periodo de fatiga y estabilización de las suspensiones, mediante transductor laser de velocidad-corriente, y son el reflejo de los parámetros a largo plazo del altavoz, una vez éste haya sido instalado y haya trabajado en un corto espacio de tiempo.
